

Win 7 Startup Repair Disk

When Win 7 refuses to boot, you might first try booting from Safe Mode, it has a Startup & Repair built into Safe Mode. For more serious problems with booting Win 7, create a Win 7 Startup & Repair Disk.

It's a good idea to create a Win 7 Startup and Repair Disk before you need it. There is a video to help you.

Click Start and type "Create A System Repair Disc" in the search box on the Start menu the link to create a disc will be at the top. If you click on it, the disc creation process starts.

Or you can use the following steps

1. Click Start...Control Panel.
2. Click System and Maintenance and select Backup and Restore.
3. Click Create a System Repair Disk in the left pane. IF you're prompted for administrator password or confirmation, type in your password or provide confirmation.
