Advanced Configuration and Power Interface Errors on Red Screen

View products that this article applies to.
This article was previously published under Q189432

SYMPTOMS
When you try to start your Windows 98-based computer, you may receive an Advanced Configuration and Power Interface (ACPI) error message on a red screen.

CAUSE

This behavior can occur if your computer has a hardware or Basic Input/Output System (BIOS)

problem. ACPI error messages on a red screen are generated by a computer's BIOS.

RESOLUTION

To resolve this issue, contact the manufacturer of your computer's BIOS to inquire about the availability of a fix for this issue.

MORE INFORMATION

For more information about ACPI, see the following Microsoft Web site:
