

Alarm system

Here's an alarm system that you probably already have and requires no installation.

Keep your car keys next to your bed on the night stand

When someone is trying to get into your house, or if you hear a noise outside your house, and just press the panic alarm on your car. It will go off from most everywhere inside your house and keep honking until your battery runs down or until you reset it with the button on the key chain. Some car alarms must be deactivate at the car. Try yours to make sure it works before you rely on it.
