

## Avast Boot Scan

First make sure your PC is not infected.

1. Open Avast
2. Click Maintenance
3. Select 'Update' and make sure you have uploaded the most recent virus definition file and the latest version of Avast.
4. Turn off System Restore. You may enable it again and create a new restore point after running Boot-Time scan.
5. Run Boot Time Scan.
  - a. Click Scan Computer on the left column. From the menu select Boot-Time Scan and click Schedule.
  - b. Restart your computer. The scan will automatically start. This takes quite a long time if you have a large hard drive and an external drive, etc.
  - c. Select to move all viruses found to the Virus Chest.
  - d. When finished, restart your computer and enable System Restore.
  - e. Create a new System Restore Point.
  - f.
