

Reset DSL Modem

1. Shut down the computer.
2. Unplug Router's power cord. (skip if you're not using a router)
3. Turn off DSL modem, in that order.
4. Wait 30 sec.
5. Turn on DSL modem, wait for 3 lights green,
6. Plug power cord back to router, wait for it's lights. (skip if not using a router)
7. Turn on the computer.

Click the big 'E' to bring up Internet Explorer. You should now be able to go to web sites.
