

## **ADDRESS Missing from Taskbar Toolbar**

**When you upgrade XP SP2 to XP SP3 you lose the Address bar in the Taskbar's Toolbar. There is a way to 'fix' it but to me it isn't worth the bother. You can add Internet Explorer to the Toolbar easy and click it to bring up IE and enter the address.**

**Click NEW Toolbar, locate the Internet Explorer in the Program Files and doubleclick it. It will be added to the Toolbar.**

**For more info:**

**[Click here: Fix: After installing Windows XP SP3, the Address Bar is Removed from the main taskbar « the back room tech](#)**
