**Browser Branding**

Has your Internet Explorer been branded by Yahoo, Verizon, AOL, Comcast or others?

To remove ANY branding from your IE browser window (this includes comcast, verizon and AOL branding)

Close MSIE
Click Start….click RUN
Into the RUN box type (or copy and paste) the following line.

**rundll32 iedkcs32.dll,Clear  Press OK**

This removes ALL third party branding bringing your window back to plain 'microsoft internet explorer'. If you had any windows open they will not be changed, but when you close them and open a new one the new one will not be branded.

Note: Often times you will find a checked box on web pages that states "Make Yahoo The Default".  Be sure to uncheck such boxes unless you really do want to make Yahoo your default Home Page.
