

Block Cookies

- 1. Click the big E on the desktop to bring up Internet Explorer.**
- 2. Click Tools...Internet Options.**
- 3. Click Privacy....move the slider up to a higher level. Cookies from all Web sites will be blocked. Keep in mind, that many websites will NOT allow you to visit them unless you do allow them to put a cookie on your computer.**

Medium is the default.

If you find later that many sites give you a message that you can't access that site, it's most likely because you're not accepting cookies and you may want to lower that setting.

Revised 3/13/2009 JMM
