

System File Checker to Repair Microsoft Internet Explorer in XP

To Repair Internet Explorer 6.x (Win2k / WinXP)

Start -> Run

Type: sfc /scannow

Click OK

Follow the prompts

Reboot when System File Checker completes

Note: the Microsoft Windows XP Install CD-ROM must be available as it will be requested should a file be found that is corrupted or missing.

For more info see MS Knowledge Base 318378 at www.microsoft.com

Note: Other XP system files may be restored using the System File Checker (sfc)
