

## **Saving a Web Page in IE 8**

- 1. Open the web page.**
- 2. Click File or on the command toolbar choose Page.**
- 3. Usually the folder in which to save it comes up as Documents, but you may choose a different folder if you prefer.**
- 4. The website name will be already listed in the Name box but you may change the name, if you prefer**
- 5. Click SAVE**

**Note: To choose a different format (other than the default MHTML), click the down arrow in the Save as Type box and select a format listed.**
