

PDF Files Attached to AOL Email

If you have changed your .pdf files to be opened by a pdf reader other than Adobe, you can still open the file quickly using your specified program.

1. Download the attached .pdf file
2. When the screen pops up giving you the option to Open File, don't click it.
3. Instead Click Find File and doubleclick the file there...your pdf reader will open it for you. You do not have to download Adobe pdf reader.
