DLink Security

1. At the DLink site (www.dlink.com), click Setup, click Wireless Settings.

2. Check that the Wirless Network Settings are as follows:
   a. Enable Wireless checked
   b. Wireless Network name (SSID) shows the name of your network.
   c. Wireless Channel shows the channel that you've found works best.
   d. Enable Auto Channel Scan checked
   e. 802.11 Mode; shows 802.11b/g/n mixed
   f. Visibility Status radio dot in Visible

3. Under the Wireless Security Mode, click the down arrow and select WEP or WPA. Follow direction for creating passphrase and write it down and put in a safe place (not on the front of your computer), but a place where you can find it should you forget it.
