IPad Syncs Address Book via gMail

IPAD syncs easily with Google features. If you use AOL or other email, open a gmail account. You really should have a 2nd (free) email account and gMail is a good one. You can set a preference in gMail to forward all mail to your primary account automatically.

On your gMail account, click on "Contacts", then "More" at the top and select "Import" and fill in info. You can create a separate address list of those in your primary account.

You will need to log into your Google account. Sync the IPAD via iTunes. It will update the contacts on the App that is pre installed on the IPAD. No doubt it works with other emails but definitely with Outlook and Outlook Express. It also syncs with the Google Calendar which can be edited via the IPAD.

If more info is needed, contact Virginia Mauldin at VADEE2@AOL.COM

Revised 7/21/2012JMM

IRS Questions Dependents Listed

I just received my tax return for 2011 back from the IRS. It puzzles me!!! They are questioning how many dependents I claimed. I guess it was because of my response to the question: "List all dependents?" I replied: 12 million illegal immigrants; 3 million crack heads; 42 million unemployed people on food stamps, 2 million people in over 243 prisons; Half of Mexico; and 535 persons in the U.S. House and Senate." 1 useless President. Evidently, this was NOT an acceptable answer.

I KEEP ASKING MYSELF, WHO DID I MISS?
