COMPUTER PLUS MEETING

Computer Plus will meet on Thursday April 19, 2012 at 1:00 PM at Laurel Manor Recreation Center.

The subject of the meeting will cover Organization with Favorite Programs by John Campbell.

All Village residents are invited to attend the meeting.

For more information please contact Pete Rosendahl at 352-409-7247.

My laptop and email list went to the graveyard but we are trying to resurrect the hard drive to get it back.
In the meantime, we built a temporary list and we hope that you are OK with receiving this meeting announcement. We will make a change in how we manage the email list before the next meeting. Thanks for your patience and understanding.   PR

If you need any more information or have any comments please let us know:

Pete Rosendahl   pjrdbs@msn.com

The Villages Computer Club

The Villages Computer Club will host another great WORKSHOP event at La Hacienda Recreation Center on Friday April 20th at 1:00 pm.

Here in an informal setting you will be able to get your computer questions and concerns answered by knowledgeable experts. The subject tables will be iPad, AOL, Email, Kindle Fire, Computer Security, Photography, Facebook, Skype, Questions on XP, VISTA and Windows 7 and General PC questions.

This is always a time where you can gain lots of helpful computer knowledge and have a good time. We will have refreshments and our 50/50 and door prices.

For more information on the VCC please reference the clubs web site or email Paul Rabenold at TVCC.Pres@gmail.com

HEADS UP!!!
There has been a huge amount of calls and/or emails trying to convince folks that they have a virus (or other computer problem) and an offer to 'fix' the problem. PLEASE DON'T RESPOND. These are Phishing calls and emails trying to get your credit card, your personal info,etc. OFten they claim to be from your anti-virus manufacturer or from Microsoft.

Quote from Microsoft:

"Microsoft takes the privacy and security of our customers and partners personal information very seriously. We are advising customers to treat all unsolicited phone calls with skepticism and not to provide any personal information to anyone over the phone or online. Anyone who receives an unsolicited call from someone claiming to be from Microsoft should hang up. *We can assure you Microsoft does not make these kinds of calls."*
"For more information on this scam and how to protect yourself against this, please click [here]"

Our Tip:

If you receive one of these unsolicited phone calls, hang up and do not download anything they ask you to. And definitely don't hand over your credit card details, just because someone mentions the well known name 'Microsoft'.

If you have allowed them to take control of your computer, or download their 'fix' software, it is possible they have infected your computer with a virus or other malware. To avoid the potential for identity theft issues and computer problems due to the viruses or malware that they may have downloaded, **we would strongly recommend that**

you take your computer to a reputable computer repair shop to have it thoroughly checked out.

Connect to an Available Wireless Network

When you connect your computer to a network by using an Ethernet cable, Win 7 automatically creates the network connection. To connect to a wireless network for the first time, YOU need to make the connection.

Connect to an Available Wireless Network

1. In the notification area look for either a single monitor screen or a stack of reeds toy. This will be the icon for the wireless connection. Click that icon to open the wireless network box where there will be a list of wireless networks that are available. If the network says Secured, it means you must enter a wep or wpa code before you can connect.

2. There may also be a box to click to show Available Wireless Networks. you should recognize your own wireless network since you set it up.

3. Click the wireless network to which you wish to connect, then click the Connect button. If necessary enter the WEP or WPA password.

4. In Win 7 each network profile includes these settings:

a. Network discovery - can the computer see and be seen by other computers connected to the same network.

b. File and printer sharing - shows if network users can access files and printers you have shared.

c. Public folder sharing - shows if network users can access files stored in the Public folders in your computer.

d. Media streaming - shows if network users can access music, videos and pictures stored in your media library.

e. File sharing - shows the security requirements for devices that connect to your computer's file sharing connections.

f. Password-protected sharing - shows if files are available to any network user or only to users with user accounts in your computer.

g. HomeGroup connections - shows if only those with User Accounts can be joined to your homegroup.

Note: Network connection types and homegroups may not be available on a computer running an earlier version of Windows.

Changing Web page fonts and background colors

When Web authors and designers create Web pages, they often specify particular type (font) faces, colors, sizes, and background colors. These settings are specified for each item, or in a "style sheet", which is a type of template for specifying how different styles should appear throughout a Web page or site.

You can override any or all of these settings, which is useful if you have limited or low vision. You can specify your font and color preferences for all pages that do not use style sheets, and then you can specify whether to use any or all of your preferences on pages that use style sheets.

****

To change the appearance of the Windows toolbar

- You can add or remove standard toolbar buttons, use smaller toolbar buttons like the ones used in Microsoft Office, and change the order they are displayed on the toolbar. Just right-click the toolbar, and then click **Customize**.
- You can move or resize the Address bar and Links bar by dragging them up, down, left, or right. You can even move them into the menu bar!
- You can hide the Address bar or Links bar by right-clicking the toolbar, and then clearing the check mark for each item you want to hide.
- You can add items to the Links bar by dragging the icon from the Address bar or dragging a link from a Web page.
- You can rearrange items on the Links bar by dragging them to a new location on **the bar.**

To display Web page text larger or smaller

- On the **View** menu, point to **Text Size**, and then click the size you want. .

To change how Web page colors are displayed

1. On the **Tools** menu in Internet Explorer, click **Internet Options**.
2. On the **General** tab, click **Colors**.
3. Change the settings as needed.

To specify fonts and colors to always use for Web pages

1. On the **Tools** menu in Internet Explorer, click **Internet Options**.
2. On the **General** tab, click **Accessibility**.
3. Change the settings as needed

SMTP reply codes

See rfc2821 for the basic specification of SMTP; see also rfc1123 for important additional
information.

See rfc1893 and rfc2034 for information about enhanced status codes.

Check the RFC index for further mail-related RFCs.

Reply codes in numerical order	
Code	**Meaning**
200	(nonstandard success response, see rfc876)
211	System status, or system help reply
214	Help message
220	<domain> Service ready
221	<domain> Service closing transmission channel
250	Requested mail action okay, completed
251	User not local; will forward to <forward-path>
354	Start mail input; end with <CRLF>.<CRLF>
421	<domain> Service not available, closing transmission channel
450	Requested mail action not taken: mailbox unavailable
451	Requested action aborted: local error in processing
452	Requested action not taken: insufficient system storage
500	Syntax error, command unrecognised
501	Syntax error in parameters or arguments
502	Command not implemented

Reply codes in numerical order	
Code	**Meaning**
503	Bad sequence of commands
504	Command parameter not implemented
521	<domain> does not accept mail (see rfc1846)
530	Access denied (???a Sendmailism)
550	Requested action not taken: mailbox unavailable
551	User not local; please try <forward-path>
552	Requested mail action aborted: exceeded storage allocation
553	Requested action not taken: mailbox name not allowed
554	Transaction failed

Reply codes grouped by command		
Command	**Code**	**Description**
connect

TWO DIFFERENT DOCTORS' OFFICES

Two patients limp into two different medical clinics with the same complaint. Both have trouble walking and appear to require a hip replacement.

The FIRST patient is examined within the hour, is x-rayed the same day and has a time booked for surgery the following week.

The SECOND sees his family doctor after waiting 3 weeks for an appointment, then waits 8 weeks to see a specialist, then gets an x-ray, which isn't reviewed for another week and finally has his surgery scheduled for 6 months from then.

Why the different treatment for the two patients?

The FIRST is a Golden Retriever.
The SECOND is a Senior Citizen.

Next time take me to a vet!
