MailWasher

- Free version – limited to one account
- Monitor email while on server
- No need to create other spam filters
- www.mailwasher.net

MailWasher - The Reliable Free Spam Blocker

Over 8 million people use MailWasher to manage their email in one place and remove their spam

Try it now - it's free!

Introducing MailWasher, the leader in spam filter software, and the easiest way to check and manage your e-mails before you download them.

MailWasher is **free to use and won't ever expire**. It works with Outlook, Outlook Express and every other email program.

Use this powerful spam blocker software to effectively stop email spam. Discover the safe way to stop unwanted e-mails before they get to your computer.

No gimmicks here, it is so easy to set up and use that you'll be managing your email like a pro in seconds. It can even be used as an effective privacy tool.

I think you will find this to be the easiest, most effective way to manage your incoming e-mails and stop spam. You will be amazed at how quickly you will like using MailWasher.

Best regards

Nick Bolton - MailWasher.net and
Firetrust Email Security.

PC World Readers Choice Award for Best Anti-Spam Software

'My Favourite Spam Fighter!' - Steve Bass, PC World

> I just love your program, it saves me so much time when checking my e-mail. I am hoping that with continued use that the spam will go away. Your program is worth the money. Thanks for this program.

Craig M. Starks

> I don't usually take time to comment on products, but this one deserves special note. I receive 300-500 emails a day...if

Features and benefits

Delete unwanted e-mails before you download to your computer. You'll be able to see who the email is from, the subject, and the attachment. This will enable you to decide if you want to delete the email or keep it. A great way to stop viruses, large attachments or to just delete unnecessary emails from getting to your computer.

Preview. Easily preview the message in your email to see what the sender has to say before downloading it to your computer. This ensures you won't download any nasty emails to your computer. Additionally, spam is marked in a red color, and your good email is marked as a green color for quick analysis.

Anti spam tools. Comprehensive anti spam tools ranging from your personal friends list and blacklist, customizable filters, external blacklists, bayesian spam filtering which quickly learns to distinguish your spam and good email and email virus filtering.

- **Friends List.** Add your friends email addresses to MailWasher and they will always be recognised. You can even hide your friends from the screen so the spam is easy to recognise.
- **Bounce** back unwanted e-mails so it looks as if your email address is not valid. This will make the sender think your address is no longer active so your name can be removed from their list. This unique feature is great for privacy and it couldn't be simpler!
- **Filtering**. Effective filtering to automatically spot spam, plus it uses a customisable list of blacklisted e-mail senders and/or regular expressions to filter out potential spammer addresses and messages.
- **Bayesian spam filtering.** This clever type of spam filtering learns which of your email is spam and which is not very quickly and accurately.

Recycle bin. If you accidentally delete an email, you can restore it back to your email account.

Most recent User Reviews for *MailWasher Free*

★★★★★

Reviewed by: isaac38
10-18-2007

Duration of ownership: 1 Years

Strengths: Ease of use and features

Weaknesses: none

Overall Evaluation: I have tried others and this program is head and shoulders above all others. Easy to set up, it does all the work after that. I would have no other.

★★★★☆

Reviewed by: Anysia
05-25-2007

Duration of ownership: 3 Years

Strengths: First Alert spam base, easy to set up, can set up more than one email account including hotmail accounts, abilty to edit fake domains with wildcards to catch all of the generated sender names, specific filters and spam lists can be created, can recover accidently deleted emails.

Weaknesses: If the size of the black list gets too big, you will get errors.

Overall Evaluation: I had tried other spam filtering software, including one built into my email program, but they never quite did the trick. MailWasher catches and purges over 90% of incoming spam, and after running the program through it's "Learning" phase, you can actually boost that to close to 100% of spam is filtered and purged.
