

CD Auto Run

AutoRun plays CDs as soon as you put them in the drive. If you don't like this feature, you can turn it off. Doubleclick MY COMPUTER. Find your CD-ROM drive on the list, then rightclick on it. Select Properties.

Click the Settings tab and deselect Auto Insert Notification or click the Properties tab and place a check in the Auto Play box. Click Apply and Ok.

IF your CD-Rom doesn't have a button to open and close it, try this:

Doubleclick MY COMPUTER, rightclick the CD-ROM drive and select EJECT.
