

Cmos Settings for WinX

- a. While the system is off, turn it on and carefully watch at the very beginning of it's coming to life for instructions to ENTER THE SETUP MODE. These instructions differ with different systems.
- b. Follow these instructions.
- c. A page will appear, if your system will <print screen> do that by turning on printer and pressing the <shift> key and <PrScr> to print the page. Print each of the pages if there is more than one. If your system will not Print Screen, you will have to copy the information on these pages.
- d. Place these pages into an envelope marked "CMOS settings", record the date and place with the boot disk.
