

Advanced SystemCare

It heals and speeds up my PC in just 1 click, so that I do not have to re-install my Windows or purchase a new computer. It is the simplest way to protect, clean, repair, and optimize my PC. I also find that it can scan and fix what other tools miss. I really like it and best of all, it is completely free. They do not insert adware to your PC and they do not spy on you. Advanced SystemCare has received very positive reviews from publications such as Forbes, CNET and PC Magazine. It will keep your PC error-free and running smoother than ever. You can download it for free at <http://www.iobit.com/advancedwindowscareper.html>
