

## **Computer System Information Saved**

*BELARC ADVISOR. Free Download [http://www.belarc.com/free\\_download.html](http://www.belarc.com/free_download.html)*

*Download and install Belarc Advisor and doubleclick to run from the desktop icon. It will create a Belarc Report with that days date on it. Create a folder in you're my Documents folder and name it Belarc Reports. Each time you run the Belarc Advisor, save the report to this folder.*

*The report provides information on all hardware and software you are running including the Key for software installed. It even tells you the version number.*

*Revised 7/22/2009 JMM*
