CheckDisk
Windows NT/2000/XP

1.Click Start, select Run.
2.Type cmd
3.Click Ok.
4.Run the chkdsk utility (similar to Scandisk) by typing in the following command:
chkdsk c: /f   and press ENTER (The /f command automatically fixes any errors encountered)

 IF running XP, you will get the message that it can't run this now and would you like to schedule it for the next time you start your computer. Type Y for YES and click ENTER
5.IF running Win98, when chkdsk is finished, type exit and press ENTER.

Note: ScanDisk is manufactured by Microsoft, a vendor independent of McAfee; we make no warranty, implied or otherwise, regarding this product's performance or reliability. If you have any issues or questions regarding it please contact Microsoft Support.
