DLL Call Error Message

"Your program is making an
invalid dynamic link call to a .DLL file"

     Close

When this happens, click CTRL+ALT+Del and see what programs are listed there. Look for a program that is listed that says (Not Responding). If you find such,

Click START...Run and type in msconfig.
Click the STARTUP tab and remove the check by the program that said (Not Responding)
Click Apply ...OK and restart. You should no longer see the error message.
