

## **Print Screen Enlarged**

Q. The Print Screens I receive from you are enlarged. How can I enlarge my Print Screens before sending them?

A. You will need to download the XP Power Toy - Image Resizer from [www.microsoft.com](http://www.microsoft.com)

1. Download it, you don't have to install, it does that automatically.
2. Once downloaded it, any time you rightclick a picture you'll have the drop down menu option to RESIZE .
3. When you do a print scr which is a picture and paste that pic to an email, you just rightclick it and select to Resize-Full page.
