

HP Tools and Recovery Disks Created

Most HP Computer comes with a Recovery Program installed on the D:\ drive. Manual instructions also suggests that you create a set of Tools (startup disk) and Recovery Disks and store them in a safe place.

1. Click Start...Programs
2. Locate and click PC HELP and Tools
3. Follow instructions to create a set of Disks to recover your computer back to factory setup should you have a serious crash.
- 4.

If you didn't create these disks, then the option should still be available for you in your Start Menu.

HP and Compaq Recovery Disks Available at link below
