Snipping Tool

Here's how you can reveal the Snipping Tool in Windows Vista, if it's not yet enabled in your system:

1. Click on Vista Start button, and go to Control Panel.
2. Click on **Programs** link.
3. Click on **Turn Windows features on or off** link. If User Account Control pops up for confirmation, click on Continue button.
4. Scroll down the list of features in Windows Features dialog window, tick the check box for **Tablet-PC Optional Components** to enable and show the Snipping Tool in Vista.
5. Click OK when done.
