

VISTA ADVISOR

Considering Upgrading your XP 32 bit computer to Vista????

First download and run the Vista Advisor [Click here: Windows Vista: Upgrade Advisor](#)

There is also Windows Vista: Upgrade Advisors for earlier editions before XP, so download and run the correct version.

Also, be sure that all devices that you intend to use with Vista is plugged into the computer and turned on when you run the advisor, including USB adapters, printers, external hard drives, scanners, etc. After the Vista Upgrade Advisor scan is complete, it will tell you which device will require new drivers to be compatible with Vista. IF it tells you that information about a particular device is not found, go to the manufacturer's web site and check for Vista Driver updates before accepting that the device will not work with Vista.
