VISTA MSCONFIG

IF you haven't been able to access msconfig in your new Vista OS, try this:

The run command can be added to the start menu by clicking on the Start Button, Properties, Start Menu and Customize. Scroll down, until you find the Run Command and click the box. That's if you want to do things the old way. The easy way is to click Start and type msconfig in the search box. You can find and run any command this way.

Revised 6/11/2009 JMM

You can customize how links, icons, and menus look and behave on the Start menu. Printers Diogram Defaults Run command Search Ravorites and History Search Programs Sort All Programs menu by name System Administrative Tools Display on the All Programs menu Cuse Default Settings E-mail Windows Mell OK Cancel Apply	resultar and Start Menu Ph	openes		075
