

Monitors Multiple in Win 7

When you plug a monitor into a laptop Win 7 automatically detects the monitor. However, you must enable additional display and specify how you want to use it.

- 1. Connect the additional monitor to your laptop's VGA, DVI or HDMI port.**
- 2. Turn on the monitor.**
- 3. From the screen Resolution menu, click DETECT.**
- 4. Select the newly detected display.**
- 5. Select EXTEND THESE DISPLAYS. The desktop will then appear on the second monitor as well as on the primary monitor screen.**
- 6. Click APPLY and OK.**
