Windows Troubleshooter Programs

All Windows operating systems supply a list of TROUBLESHOOTER programs. These are a great source for Self-Help.

To reach the Troubleshooter List in XP:

1. Rightclick START….click Explore

2. Click HELP and select Help and Support to go to the Help & Support Center.

3. Into the SEARCH box, type Troubleshooters.

4. From the options given, select List of Troubleshooters.

5. From the list given, select the one you need for the specific problem you now are trying to solve.

6. Follow each step given

Troubleshooting Programs for Win 7

1. Click Start

2. Click Control Panel

3. Scroll down and select Troubleshooters

4. Select the particular troubleshooter program you need.

> **a. Programs**
>
> **b. Hardware and Sound**
>
