

XP EVENT ID Viewer

Use the XP Event Id list to diagnose PC Problems.

1. Click Start...settings...control panel...administrative Tools...Event Viewer.
2. You can skip the 'Information' events, but open and pay attention to the 'Error' and 'Warning' entries.
3. Doubleclick the 'Error' or 'Warning' event to open it's Properties page.
4. There will be information about the event. For more info, click the link to Microsoft support web site.
5. To obtain more info, look for keywords in the Event info and plug that into the Event Id or into Google.com for more info.
