

## **Copy and Paste Does not Work**

**When you highlight and select a document in MSWord or other word processor and then attempt to paste that to a different program such as Word Pad or an email, it just won't paste. It doesn't even copy it to the computers clipboard. What can you do?**

### **Solution:**

**Restart your computer.**

**There are all kinds of 'fixes' listed in Google but try the simplest first.**
