

FOLDER AND FILE ICONS OR DETAILS

For a demo, rightclick START and click Explore.

If you prefer to see pictures (icons) that represent the subfolders stored in a folder, then you would want to click VIEW and select ICONS. But, if you prefer to know more about each file, then click VIEW and select DETAILS. This gives you the name, size, last modified.

On the menu bar at the top of the page you will usually see a little block that has what appears to be tiny icons on it. Click that little icon and you'll get the same choices as when clicking VIEW. There are also other choices such as thumbnails, that's icons with a frame. Also, List which is just a list of folder content with no other info.
