

Hard Drive Installed but does not Show on My Computer.

If the hard drive shows up in Device Manager, and seems to be working properly, you can assign it a drive letter.

1. Right click My Computer and select Manage.
2. Click Storage and select Disk Management.
3. In the right panel, rightclick the drive.
4. Click Change Drive Letter And Paths.
5. Click Add and select Assign The Following Drive Letter. Then accept the default drive letter or choose a new one.
6. Click Ok to finish.
