Window Washer

Free Internet Window Washer is an Internet tracks eraser and privacy cleaner software. As you work on your computer and browse the Internet, you leave behind traces of your activity. With a simple click Free Internet Window Washer securely erases your Internet tracks, computer activities and programs history information stored in many hidden files on your computer. It also provides you option to clean the data from your PC more securely so that they could not be recovered. Free Internet Window Washer allows you to erase Window's temp folders, run history, search history, open/save history, recent documents, your browser's cache, cookies, history, visited URLs, typed URLs, autocomplete memory, index.dat files, Google search history, and Yahoo search history.

You can also easily erase the tracks of up to 100 popular applications.
