

IPad Syncs Address Book via gMail

IPAD syncs easily with Google features. If you use AOL or other email, open a gmail account. You really should have a 2nd (free) email account and gMail is a good one. You can set a preference in gMail to forward all mail to your primary account automatically.

On your gMail account, click on "Contacts", then "More" at the top and select "Import" and fill in info. You can create a separate address list of those in your primary account.

You will need to log into your Google account. Sync the IPAD via iTunes. It will update the contacts on the App that is pre installed on the IPAD. No doubt it works with other emails but definitely with Outlook and Outlook Express. It also syncs with the Google Calendar which can be edited via the IPAD.
