

RECORD NOW CD-WRITER

Create the data disc

After closing all programs running in the background, use the following steps to create a data disc:

1. Open the RecordNow software.
2. From the main menu in the software, click **Make a Data Disc**. (Figure 2)

Figure 2: RecordNow main menu

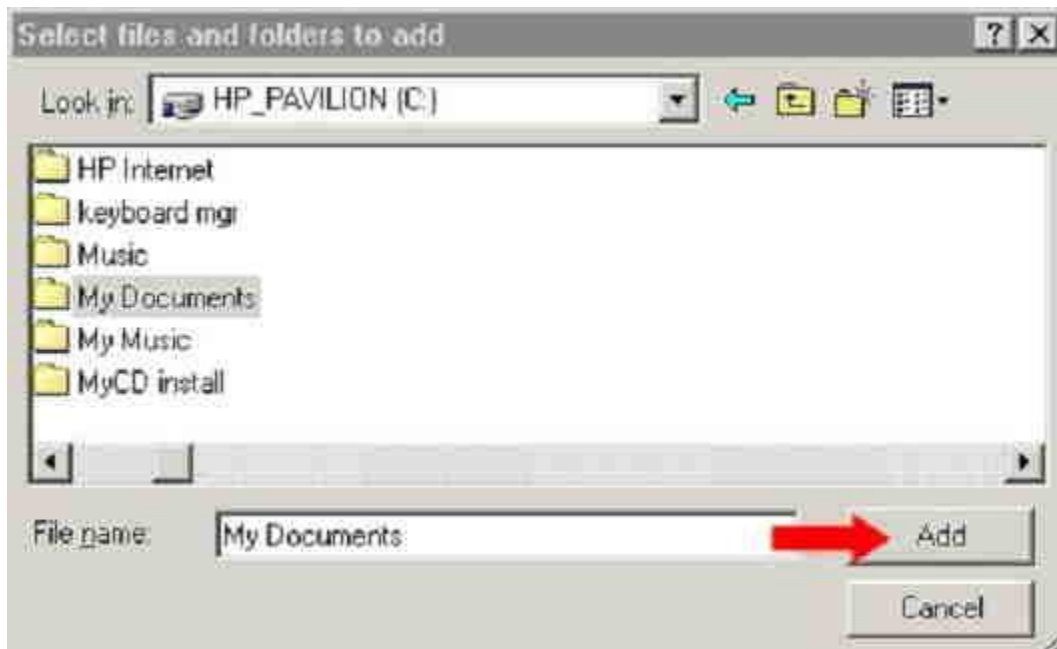

3. The recording software automatically opens the CD Recorder drive and prompts to insert a blank or appendable disc. Insert the disc to be used and click **Next**.
4. To select the data to copy to the CD, click **Add Files and Folders** (Figure 3).

Figure 3: Add Files and Folders

5. Click the files or folders to include, and click **Add** (Figure 4). To select multiple files or folders, hold down CTRL, click the files or folders to include on the disc, then click **Add**.

Figure 4: Add files

6. Once all files and folders to copy have been selected, click **Next** to begin the write operation.
7. The software will perform a “write speed test” and then will begin to copy the files to disc.
8. The CD will be ejected automatically when the copy is complete.

More information for using the RecordNow software
