

Solitaire Card Games

[Click here: Pretty Good Solitaire - Play 610 solitaire card games](#)

<http://www.goodsol.com/>

This is the site that offers enhanced versions of games, including Free Cell and Spider. They work sort of automatically by right clicking on what you want to move and the game moves it where it thinks it should be which you can then correct if you don't like it. Also can back up any number of moves by clicking the center button, all the way back to the beginning if you want.

This is a 30 day trial version before purchase.
