

Using CutePDF Writer to create PDF document:

DO NOT look for any application to run. Just print your document using CutePDF Writer (the printer) to get PDF output.

1. Open your original document and select **Print** command in File menu of your application to bring up **Print** dialog box. (CutePDF will be listed with the Printers when installed)
2. Then select CutePDF Writer as the Printer to print (**DO NOT select "Print to file"** option).
3. You will get a Save As dialog box prompted for saving created PDF file.
Select a folder to Save in and enter a File name, then click on **Save**.
4. Go to that folder to find your PDF file.

- * CutePDF Writer supports Microsoft Windows 98/ME/2000/XP/2003/Vista (x32/x64).
- * CutePDF Writer requires PS2PDF converter. You may get a free converter [here](#).
