Windows Explorer's File Detail View

To choose the details that you wish to see in Explorer's file details when you use VIEW-Details.

1. Rightclick Start and click Explore. (if using Win 7 click Open Windows Explore)
2. On the right side of the screen is a listing of files. Rightclick in the title bar of any column to bring up the Options list.
3. Click MORE at the bottom of the list to see even more options.
4. Add a detail by clicking the option you want. Remove a detail by clicking an option that has a check by it.
