

## Windows Files

**Q. Can I delete these files to save Hard Disk space?**

**A. These are Windows Updates. The KBxxxxxx are lists of Microsoft Knowledge Base items.**

**I found the following on Google. [Click here: Can I delete \\$hf\\_mig\\$, \\$NtServicePackUninstall\\$, \\$NtUninstallKB8287](#)**

**"\$hf\_mig\$, \$NtServicePackUninstall\$, \$NtUninstallKB828741\$, ....." files in windows folder, which seem to be traces of windows updates.**

**[Can I remove them to save HDD space without any problem?](#)**

**Do *\*not\** delete the \$hf\_mig\$ folder, the rest you can delete as long as it is ok to lose the option to uninstall the updates later on (only interesting if you suspect that one of the updates have caused you problems).**

**Revised 6/13/2009**
