

WINDOWS INSTALLER SERVICE

Note: If the Windows Installer service has been disabled and you run a Setup program without manually starting the Windows Installer, you may receive the following error message:

“The Windows Installer service could not be accessed. Contact your support personnel to verify that the windows Installer service is properly registered. “

How to start the Windows Installer service

Note The Windows Installer service does not start if you disable **Load System Services**. To use Windows Installer in this case, you must start the service manually:

1. Click **Start**, right-click **My Computer**, and then click **Manage**.
2. In the left pane, click **Services and Applications**, and then click **Services**.
3. In the right pane, right-click **Windows Installer**, and then click **Start**.
