

## **Word Perfect Arrows**

You can quickly create attractive line arrows using the Draw Line feature in WordPerfect.

1. Choose Insert, Shape, Draw Line from the menu.
2. Drag your mouse pointer across your document to create the line's length and orientation, then release the mouse button.
3. Click the Arrow Start (or Change The Look At The Start Of A Line) button and select a shape from the palette for the head of your arrow.
4. Then click the Arrow End (or Change The Look At The End Of A Line) button and select a tail shape from the palette.
  5. Click outside the line to return to normal text editing.
